All names of cities, towns, villages, or hamlets are alphabetically listed whether they appear on old or modern, federal, provincial, or local maps. All available statistics have also been closely examined, with the result that this map and index both contain hundreds of names not listed on previous maps of Quebec, making this the first complete bilingual commercial map of Quebec Province so far issued.

To locate a place:

Having located in the index the name of any place, the secondary name by which such a place is sometimes known will be found in brackets immediately after it. Immediately following this secondary name are the index numbers for use with Might's "Instant" Indicator. To locate such a town on the map, swing the tap indicator until the left edge of it rests at the first number shown in the index. These first numbers are printed around the edges of the map. Run your finger up the tape itself to the second number shown in the index. The place you are looking for will be at that point.

In what county, township, parish is Aylmer?

Is it a Post Office, Money Order P.O., or Summer P.O.?

Preceding index numbers is the name of the county. Following the index numbers is the name of the township and parish. In some cases townships may not be shown, but if the township name is not shown, small numbers indicating the name of the parish appear. In most cases the name of the township is immediately followed by numbers indicating the parish as well as the township. In some cases the name of the township and parish are identical. In this case parish information is shown which either indicates that the two names are identical, or the name of the township has not been available.

The sign  means Post Office. The sign  means Money Order Post Office. The sign  means Summer Post Office.

What is the nearest Business Centre?

Following is the  for the nearest business centre and the name of that centre.

Has Aylmer Telephone and Telegraph Connection?

If a town has outside telephone and telegraph connection, the signs   so indicate.

What is the population?

Population 1921 and 1931 are both shown where possible in this order, following the letter "P." Where only one population is listed, it is the 1921 census estimate.

What Banks serve Aylmer?

See Banking Directory, pages 44-47.

Where are County Statistics?

See pages 2-3.

Where is Parish Directory?

See pages 50-52.

Where is List of Abbreviations?

See always.

In some cases it has been impossible to find the exact location of a community and in others there has not been room on the map to show the name. Such names are all listed in the index and following such names is the   meaning "near" another town which is located on the map, and following the name of that town in brackets are figures indicating the distance from that town.

Some towns in the index are not shown on the map because we can find no exact information for them. The nearest town is, however, indicated as the business centre, although that town may not actually be the business centre. But on referring to the name indicated as business centre, the actual business centre will probably be located, provided the business centre we have shown is not always used as a business centre for the place in question.

Toutes les statistiques disponibles ont été examinées avec soin, avec le résultat que la carte géographique aussi bien que l'index qui l'accompagne contiennent des centaines de noms qui jusqu'à date n'avaient jamais été mentionnés sur aucune carte géographique de Québec, et en font la première carte géographique bilingue commerciale complète publiée pour la Province de Québec.

Pour localiser une place

Ayant trouvé dans l'index le nom d'une place, le nom secondaire par laquelle telle place est quelquefois connue sera trouvé entre parenthèses immédiatement après le nom de la place. Dans plusieurs cas le nom de la concession est immédiatement suivie par des numéros indiquant la paroisse aussi bien que la concession. Dans quelques cas le nom de la concession et de la paroisse sont pareilles. Dans ce cas des renseignements de paroisse sont montrés faisant voir que les deux sont pareilles, ou que le nom de la concession était improcurable. Le signe ✉ indique un Bureau de Poste. Dans certains cas il a été impossible de trouver la situation exacte d'une concession et dans d'autres il n'y a pas eu d'espace sur la carte géographique pour montrer le nom. Tels noms sont tous cités dans l'index et suivant ces noms est le ◆, ★ vous expliquant "voir," "près" d'une autre ville qui est mentionnée sur la carte géographique, et suivant le nom de cette ville entre parenthèses sont des chiffres indiquant la distance de cette ville.

Quelques villes dans l'index ne sont pas montrées sur la carte géographique, parce que nous ne pouvons pas trouvé aucun renseignement exact pour elles. La ville la plus rapprochée est, cependant indiqué comme le centre de commerce, quoique cette ville ne peut être le centre de commerce actuel.
